

# CAMPAGNOLA

The world leader in innovative pruning solutions for the orchard and vineyard

COBRA PRO  
SPEED • POWER • COMFORT  
THE PERFECT BALANCE

## THE NEW GENERATION

**Cobra Pro** is built for speed, power, and ultimate comfort. Lightweight, with an ergonomic grip and perfect balance, the shear is operated by a very lightweight and powerful lithium-ion battery — at 58 volts, the most powerful in the industry.

### Cobra Pro offers 4 operating modes

**Automatic - 100% blade opening:** A complete blade opening and closing cycle is completed with a touch of the trigger. This mode delivers the maximum cutting speed.

**Automatic - 70% blade opening:** A narrower opening allows smaller branches to be cut with maximum speed.

**Automatic - 40% blade opening:** For the smallest of branches with maximum speed.

**Manual:** The blade opening and closing is controlled by the operator's pressure on the trigger.

### Technical Data

**Cobra Pro:**

Weight: 1.85 lbs.  
Cutting Capacity: 1.58"  
Ergonomic body/hand grip unit.  
Low maintenance with easily removable cover for cleaning and greasing.
