

**Rears Nifty Series** is the perfect sprayer for ATV or Utility Vehicle use. These are the 25 & 50-gallon models in Rears' utility tank agriculture line.

All **Nifty Series** models share Rears' unitized **stainless steel** tank design: heavy 304 grade stainless steel construction is integral to structural strength and mounted stability.

The tank and all tank fittings, lid, mechanical paddle agitation and suction assembly are constructed of non-porous stainless steel— from wettable powders to oil sprays, tank and plumbing **rinses clean** to handily move from one job to the next.

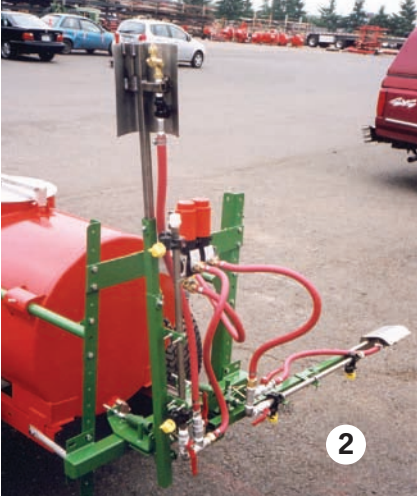

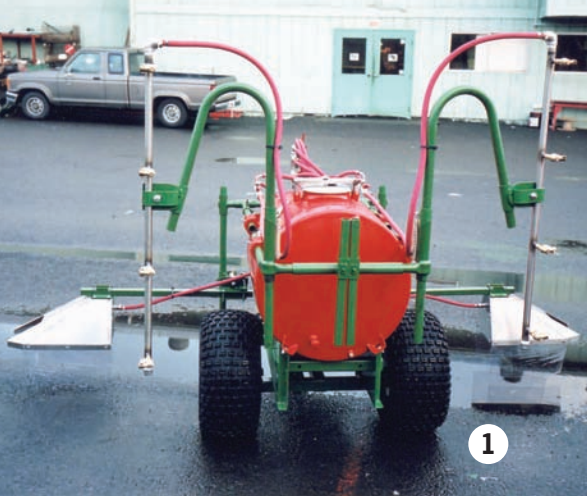

Choose **pump & power** over

Clockwise from top left: 50 gallon skid tank; 50 gallon pul-tank with boat trailer tires, hood option and Rears hosereel; 50 gallon pul-tank with floatation tires and Rears Nifty Boom; 25 gallon pul-tank with boat trailer tires.

50 gallon pul-tank with floatation tires and boomless nozzle

**304 Stainless steel** construction, 25 or 50 gallon units
